PROJECT DETAILS

1. HR Portal

Desc: This is one of a kind project, the theme is to automate all the interview/assessment processes done for any type candidate instead of doing it on pen and paper. So that it reduces the time taken for interviews and increases hiring efficiency of organizations

Languages used: HTML, CSS, Angular 7, Typescript, Bootstrap 4

Libraries: Bootstrap, Angular material

Roles and Responsibly: I have worked as a lead UI and front-end developer for best design possible. Worked in a team of 6 members who were involved in different roles such as backend developer, UX designer and data sourcing. Perform project design and development activities as per customer satisfaction. I have also worked as a delivery executive to our US client in this project.

2. Drones/ARVR Portal

Desc: We have collected all the data of drones and ARVR with popular brands like DJI, Parrot, HP, 3DR, arrow etc. and we build a search engine, with restricted-zone drones etc. Where user and owner can come and subscribe with us, with very low cost. Basically we are building a portal through which we can make interaction b/w end user and owner.

Languages used me: HTML5, CSS, Angular 6, Typescript, Bootstrap 4

Libraries: Bootstrap, CSS, Angular material 6.4., amcharts

3. APEX

Desc: This is a project in which work orders were taken from Oil/natural gas rigs by the truck drivers through the application ad deliver them to refineries. This application checks the tanker data and the graphs of the oil/extracted

Languages used: HTML5, CSS, Angular 6, Typescript, Bootstrap 3

Libraries: Bootstrap, CSS, Angular material 6.4.7, d3-charts

Roles and Responsibly: I have worked as UI and front-end developer as well as UX designer for best design possible. Worked in a team of 10 members who were involved in different roles such as
